Preface

About this book

As I write this, the United States, and much of the world, is in a recession. With readers throughout the world, I know that a lot of my readers are suffering. Some are struggling trying to figure out how they will make ends meet. Others are trying to figure out how to stretch their retirements. Some may even be sick of their jobs and are looking for a way out.

To help my readers, I searched through the thousands of programs I've promoted over the years looking for the best ways to start a business online quickly and easily. Most importantly, it had to be free or very low cost to get started.

I narrowed it down to seven programs. Some of these programs will help you make money quickly. It may be only a few dollars or a few hundred dollars. Others will help you start a full fledged business earning a six figure income.

Combine these as you like to create your own business and earn the income you want.

To get started, here's what you need to do:

Read through this ebook first. This will help you find out what is available to you. Once you have read through the ebook and chosen an opportunity, take action on that opportunity. As Jimmy D. Brown says, "Read, study, apply."

7 Courses to Teach You How to Make Money Online

Regardless of what your financial need is, I have a program that will help you. What I wanted to do was provide a broad base of choices for my readers.

Most of these programs are free. Some require a low fee. None of them cost more than \$10, and most of them you can get started without having to buy anything else.

These programs are listed according to how quickly you want to get started and how much money you want to make. I've also listed them according to how quickly you can make money.

The Programs

Fiverr:

<http://www.fiverr.com/users/jingerjarrett>

This is absolutely one of the easiest ways to make money on the internet. All you have to do is sign up for an account, and the only other thing you need is a Pay Pal account.

What this site allows you to do is post projects you will do for others or you may choose from requests. For each project that you get accepted for, or that you accept, you will make \$5.

For example, a site user wants his website submitted to the search engines. You contact the user and arrange to do the project. Complete the project. Get paid.

7 Courses to Teach You How to Make Money Online

Or, the other way is to post individual projects that you are willing to complete. Others contact you to have you do the project for them. (To see an example of this, visit my profile.)

The secret to succeeding on this website is to complete the projects as quickly as possible. There's a wide variety of projects offered, so it's a great site for just about anyone who is interested in making a little cash.

Who this is for: Those who offer services and want to make more money, and those who want to get started offering services.

Affsphere:

<http://www.askjergnow.com/recommends/affsphere>

If you like to write, this is a very simple way to make money online.

The first thing you need to do is to choose a niche you would like to write about. (A niche is a particular segment of a market. For example, internet marketing is a niche of marketing.) Select the products you would like to promote and then write your articles.

In the resource box of your articles you will include a link to the affiliate product you are promoting.

Write at least 10 articles for each of the products you have chosen. You will also want to select at least five products in each niche. You may also consider writing products reviews of these products because product reviews are popular. However, don't write a review unless you have actually used the product.

To drive more traffic to your articles, you will want to bookmark them and microblog about them. You may sign up for the following services to do this:

Onlywire – <http://www.onlywire.com/>

Ping.fm – <http://www.ping.fm/>

You may also want to consider building Squidoo lenses or a blog to promote these products. Then you may include the link to your lenses or blogs in your resource box. This will allow you to submit your articles to sites like Ezine Articles. You want your articles on Ezine Articles because it is the number one article directory on the internet and gets the most traffic.

(Please note: you may also want to submit your articles to sites like Go Articles, as well as any others that accept affiliate links.)

Who this is for: Writers, affiliate marketers who like to write articles, bum marketers.

7 Day Profit System:

<http://www.askjingernow.com/recommends/7dayprofitsystem>

One of the easiest ways I have found to make money, and anyone can do this, is to build Squidoo lenses.

Squidoo is a site created by entrepreneurial legend and internet marketer Seth Godin. What this site does is allow you to create a page that includes multiple modules or sections. These sections include books

7 Courses to Teach You How to Make Money Online

from Amazon, Ebay RSS feeds, other RSS feeds, and a ton of other types of content. You may also write content for your modules.

Once you've created your lens, either on a topic or a product, you now have a page that covers a specific topic or product in more depth. Since this is a revenue sharing site, you make money when others click or buy through your pages. The real money though is in promoting your own products or affiliate products.

To really succeed on this site, you want to get involved in the community to learn. Also, market your lenses as much as you can. You will also want to keep each Squidoo account specific to a topic.

To get your course, click the link below. It's only \$5.95, and it includes videos, as well as ebooks that will teach you everything you need to know about making money from Squidoo.

Who this is for: Beginners, affiliate marketers, business owners who own their own products or services and want to brand themselves.

7 Day Cash Finder:

<http://www.askjergernow.com/recommends/7daycash>

This is actually software. When you open the software, you will see seven different steps. Each is a separate step you need to complete to build your business, and you can build your business in only seven days.

The software includes seven different videos for you to watch to show you how to complete the steps. It also includes the tools you need to use to complete each step. What I like about the tools is that there are free

7 Courses to Teach You How to Make Money Online

options, and then there is a paid option the author uses and recommends.

This software is absolutely free. It offers everything you need to learn to start a business. You just have to do the work.

To get started, download the software and install it on your computer. Each day you will watch a new video and complete a new step. At the end of seven days, you will have your first money making business. Wash, rinse, repeat!

Who this is for: Those who want to learn how to start a business. Those who need a more step by step plan and want to get started quickly.

Make Money From the Internet:

<http://www.askingernow.com/recommends/internetmoney>

This course was created by one of the top internet marketers on the internet, Ewen Chia. As one of his readers and customers, I can say that this course is pretty solid.

This package contains seven videos and a short report. Each video contains a different step you need to follow to select your affiliate products you want to market and build your internet marketing campaigns.

Once you select your niche and product, you'll create a blogger blog. Then you monetize your blog with Google AdSense. The final step is driving traffic to your website.

Once you complete these steps, then you repeat the cycle.

To get started, download the package. Watch the videos and do the steps.

Who this is for: Affiliate marketers. Those who want to make money blogging or simply like to write about topics they are passionate about.

Fireproof Secrets of the New Rich:

<http://www.askjngernow.com/recommends/fireproofsecrets>

Although the opportunities I mentioned above can easily earn you hundreds, or even thousands of dollars per month, none of them really have the ability to earn you a six figure income, except maybe *Money From the Internet*. What makes Fireproof Secrets different, is that if you apply what you learn in this course, you can realistically earn a six figure income in as little as one year.

What this package offers is an ebook and five videos to teach you how to start a business. If you want the rest of the videos, you can purchase them for a small upgrade.

What I like about this package is that you can use it to either learn how to market affiliate programs or create your own products to market. All of the tools involved, including the website building tools, are all free, so you don't have to buy anything else.

To get started, all you have to do is read the ebook and watch the videos. Do what each video tells you to do. Choose niches you are interested in marketing.

Once you are making money, then it's a good idea to invest a little money in domains and maybe even web hosting if you are in business for the

long term. At the very least, buy domains because they make your business look more professional.

Who this is for: Those who are looking to build a long term business. Anyone who wants to make at least a six figure income.

The most important thing to remember with each of these opportunities is that ultimately you are building a business, and it's long term. Take the time to build a solid foundation for your business. Choose the opportunity that is right for you.

Net Success Formula:

<http://www.askjingernow.com/recommends/netsuccessformula>

For just 99 cents, which is a simple processing fee, you can have the ultimate package to teach you how to create your own product and build a six, possibly seven figure business.

This course is taught by entrepreneur and expert internet marketer Glen Hopkins. The focus of this course is creating your own high end product, creating a membership site to deliver your product, and creating multiple recurring streams of income.

The package itself is in video format. It includes resources you can print and use to help you build your business. With the handouts, as well as audio, video, and the appropriately recommended resources, it's step by step. If you are willing to roll your sleeves up and do some work, then this course will teach you what you need to know to build a long term business.

7 Courses to Teach You How to Make Money Online

(This course was originally offered to Glen's customers. They paid \$997 for training you will receive for only 99 cents. Don't take the training in this course lightly as it is valuable and will help you build a business.)

Who this is for: Those who want to build a long term business by creating their own products. Those who are interested in a six, possibly seven figure income.

Small Business Checklist

Once you've read through the ebook and you have some idea of what type of business you want to start, then read and answer the following questions. This will help you further clarify what you need to know to get started with your new business.

Please feel free to print out this checklist.

What is your income goal? Do you only want to earn a few extra dollars or are you looking to leave your job forever? This will help you decide which opportunity to choose. It will also show you how much work you will have to do to get your business started.

Do you want to create your own products or sell someone else's? Do you want to sell physical products or digital products? Do you want to write books and ebooks, or do you want to create other types of products?

Small Business Checklist

What are your interests? Include your hobbies, things you are good at, things you like to do, and things you know a lot about. As Seth Godin says, "Everyone is an expert on something."

Small Business Checklist

Are you willing to learn new skills? How soon do you need to start making money? Are you willing to do some writing? These questions are crucial because they will help you choose the right opportunity. To reach your goals though, you may have to choose more than one opportunity.

How much time do you have to devote to your new business? Regardless of which business you choose, you will have to invest some time in it. Factor this in when choosing which business to start. You may have to start off with one of the less intense opportunities first and then work into one or more of the others. Now get started!

Additional Resources

I won't burden you with a ton of resources that will only confuse you. Instead, I want to offer you only the essentials.

Internet Marketing Toolbar:

<http://internetmarketingforfree.ourbusinesstoolbar.com/>

This is a free resource that I created. In order to serve my readers and customers better though, I have added several additional toolbars to this toolbar to help you market your business, build Squidoo lenses and make more money from your writing. (Also includes a marketing plan to help you drive more traffic to your website.)

Works in both Internet Explorer and Firefox, and it's essential to help you make more money.

Killer Marketing Arsenal Free Internet Marketing Membership:

<http://ezine.killermarketingarsenal.com/>

This membership offers both a free and paid version. If you sign up for the free version, you'll receive the 48 Hour Plan. This plan will show you how to start a business in 48 hours or less.

Upgrade for the small monthly fee of \$10, and you can syndicate unlimited free classified ads through the system.

Writing and posting free classified ads is actually the easiest business to operate and the fastest business to run. If you don't want to bother with websites, list building, or expensive pay per click, this may be the way to go.

Additional Resources

You can grab a copy of my free ebook, *KMA Cash*. It explains how to use this technique in detail.

<http://www.jingerjarrett.com/freebooks/kmacash.pdf>

Internet Marketing Software:

<http://www.askjinger.com/software/>

Although none of the resources on this page are free, if you want scripts to build your websites, software to help you market, or tools to help you build your business, these are the best.

Ultimate Marketing Center:

<http://www.askjinger.com/recommends/umc>

Although there are plenty of web hosting companies on the internet, this is absolutely the best one if you are an online business owner. It contains all of the tools you need to start your business online,

I've hosted with this company from the beginning. That's how good it is. You won't find a company that offers you a more complete solution for your business than this one, especially not for this price. The best part is that the tech support is excellent. Kavi values his customers and does a good job of taking care of them. If I could afford only one tool for my business, this would be it.
